Project: EduGenie-AI

An AI-powered educational assistant designed to support students with learning, doubt clarification, personalized study guidance, and interactive practice.

1. Brainstorming & Idea Prioritization

Project Name: EduGenie-AI

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category
1	Sivasri N	AI-powered doubt clarification for students	Learning Support
2	Elakkiya.B	Personalized study guidance based on student needs	Personalized Learning
3	Gopika.A	AI-generated quizzes and practice questions	Assessment
4	Sadhana. E	Simple explanations for difficult concepts	Concept Learning
5	Pavithra.M	Interactive AI assistance for academic preparation	Student Support

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility	Importance	Priority Selected
1	AI-powered doubt clarification and learning support	High	High	Yes
2	Personalized study guidance	High	High	Yes
3	AI-generated quizzes and practice	High	High	Yes

2. Define Problem Statements

Project Name: EduGenie-AI

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll be able to empathize with your customers, which helps you better understand how they perceive your product or service.

EduGenie-AI Problem Statement

Problem Statement (PS)	I am	I'm trying to	But	Because	Which makes me feel
PS-1	A student seeking effective academic support.	Understand difficult topics, clear doubts, and prepare effectively for studies.	It can be difficult to get immediate, simple, and personalized academic guidance.	Learning resources and explanations may not always match the student's individual learning needs.	Confused, stressed, and less confident about learning.

3. Empathy Map

Project Name: EduGenie-AI

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS	THINKS
• I need simple explanations. • I want quick answers to my doubts. • I want help while studying.	• I need a better way to understand difficult topics. • I want learning support that suits me. • I want to improve my preparation.
DOES	FEELS
• Uses EduGenie-AI to ask academic questions. • Uses AI explanations for difficult concepts. • Practices and prepares with AI support.	• More confident when concepts are explained clearly. • Less confused while studying. • Motivated to learn and practice.
